e2020, Inc., Adopts Common Core State Standards

Now an Endorsing Partner of the Common Core State Standards Initiative

Scottsdale, AZ (March 28, 2011) – As a committed endorsing partner of the Common Core State Standards Initiative (CCSSI), e2020, Inc., announces all existing courses have been aligned to the Common Core Standards. Additionally, new courses developed by the company will utilize Common Core State Standards to create the course matrix, and scope and sequence. To provide schools and districts with a more comprehensive eLearning program model for students, the e2020 Inc., Common Core Standards alignment process is manually configured, resulting in more accurate and granular results.

“Aligning our courses to follow Common Core State Standards allows us to ensure that our content meets the standards required for each grade level,” says Michael Humphrey, President of e2020, Inc. “Utilizing a manual alignment process allows us to be extremely rigorous and accurate, ultimately providing students with a superior online learning experience.”

Adopting Common Core State Standards can be problematic when states and districts are required to sort through numerous alignment claims based solely on keyword search. By utilizing a manual analysis and comparison method, e2020, Inc., offers a more accurate system for schools and districts, improving outcomes for students. In addition, e2020, Inc., offers custom alignment to district pacing guides to more accurately depict standards and increase alignment efficiency.

As an endorsing partner of the CCSSI, e2020, Inc., supports its mission to ensure every American student graduates high school with the skills and knowledge needed to thrive in the 21st century.

About e2020, Inc.

e2020, Inc., (education2020) is a leading provider of core and elective instruction in a virtual school setting for students in grades 6-12, creating innovative, rigorous, standards-aligned courseware and online virtual instruction programs to help students recover and accrue credits for graduation and prepare for state, end-of-course, and standardized exams. e2020, Inc.’s web-based model, teacher-led video delivery, and innovative instructional approach offer engaging and individualized virtual online instruction solutions to public and private schools for use in traditional classrooms, blended school, and online programs. e2020, Inc., has implementations in 39 states with over 800 school districts and 2500 + schools served. Founded in 1998, last year e2020, Inc., provided courses for more than 335,000 students. For more information, visit www.education2020.com.
